

INSPECTION MADE OF SITES FOR PROPOSED CANYON FIRE STATION

Fire Committee of City Council, with the Chief of the Fire Department, Investigate Conditions and Sites Along Upper Tombstone Canyon and Will Report Later—Favorable Opinion Expected.

From all indications, resulting from a formal inspection of the locality and of the proposed sites, it is practically certain the fire committee of the City Council will recommend the establishment of a sub fire station in Tombstone Canyon. The committee of the city's governing board, accompanied by Barney Norton, chief of the fire department, looked over the entire ground yesterday afternoon, and will report at a special meeting of the council.

The action of the committee yesterday followed the presentation to the City Council last Tuesday night of a petition bearing the signatures of 134 residents of Tombstone Canyon and vicinity asking that adequate fire protection be given their property. The council, without discussing the merits of the matter, referred the petition to the fire committee and asked the fire chief to accompany them on the trip of inspection.

There are two feasible locations along the canyon, which the committee inspected yesterday afternoon. One lot is said to be owned by the city. It is located just north of the bottling works on the same side of the road. This lot, however, is considered too small for the purposes for which it might be intended should the council decide to put a fire station in the locality.

Another lot was looked at which is just across the street from the bottling works. This lot is large enough for the establishment and erection of a good fire station.

After making the inspection the committee was noncommittal on the subject of its report to the council, but the inference was given out that they were in favor of such a station.

The matter of a sub fire station in upper Tombstone Canyon has been agitated for some time by the residents of the section of the city. The argument has been advanced that the property located along upper Tombstone Canyon is practically at the mercy of fire. That the city has been fortunate in the past year in escaping any bad conflagrations is due more to luck than any possibility of the fire department's protection. This fact, it is stated, does not detract from the present efficiency of the fire department, as it is said to be practically impossible for the apparatus to make a run to Upper Tombstone Canyon and make any time.

Another argument advanced for the establishment of a branch station is the liability of floods along the plaza

in the summer and the impossibility of getting the fire equipment, in such an emergency up Tombstone Canyon. It has repeatedly been stated, moreover, that with the establishment of another fire station in the city the fire rates would be materially reduced. A letter was received by the fire chief some weeks ago, relative to the matter, from the insurance surveyor of the State. It was said in the letter that another survey of the city would have to be made but from the general feeling of residents who have had experience of this kind it is thought that more protection from fires would, undoubtedly, reduce the rates.

The report of the committee will be made to the City Council, upon the findings, in a very few days.

LOCAL PROJECTS WILL BE BOOMED

Commercial Club to Start Campaign of Greater Activity in Warren District Improvements.

Extensive plans for widening the scope of the work of the Warren District Commercial Club for betterments and improvements in the district and along public lines are to be undertaken by the board of directors of the organization. The first step in that direction will be an awakening of activity among any members who have permitted their interest in the club and its work to lag and a systematic membership campaign to increase the membership to the size which the past successes of the club deserve. This will permit of a still further degree of usefulness and the carrying into effect of the other plans that are soon to be announced. At the meeting of the directors of the Commercial Club held Wednesday night a variety of business was transacted. Reports were received from the secretary, membership committee, Lowell sidewalk committee, Bisbee station committee and Lowell jail committee. That of the secretary was brief, covering merely the road paving muddle, since Secretary Gray has only been back in his old position for three days. He stated that he was familiarizing himself with matters that occurred in his absence so as to be able to handle them as occasion may arise. His report on the pavement muddle was practically as the facts were published in the Review.

The Lowell sidewalk committee reported on the length of the proposed walk and its probable cost. Its recommendations were approved and the secretary instructed to take up with the Lowell Club the carrying of those recommendations into effect. The cost of the proposed improvement will be about \$950.

The committee on the Lowell jail reported the circulation of a petition for a new building which should include justice court room and jury room as well as cells. Secretary Gray reported further that the petition had been presented to the board of supervisors and by them tabled until the work of installing new cells in the county jail at Tombstone shall be completed. It will be again brought to the attention of the supervisors by the club.

Progress was reported by the Bisbee station committee and also by

the committee on the Denn bridge.

Hereafter all committee heads, whether members of the board of directors or not will be notified of all directors' meetings and asked to attend. Committee work will therefore receive an attention which it has only received in special instances in the past. Its importance is recognized by the board and the assistance of the committeemen as well as the chairmen will be courted on all occasions.

Secretary Gray stated that at a later meeting he would present for the approval of the board plans for the widening of the field of operations of the club which he hoped, if carried out, would give to it a force and prestige such as is enjoyed by no similar organization in the southwest.

The directors put the club clearly on record relative to appropriations for the coast exhibitions and retain the stand taken when the legislature was in session against the waste of money on state buildings.

WASTE OF FAIR FUNDS OPPOSED

Commercial Club Warns Bisbeeites Against Signing Petition Calling for State Buildings at 2 Expositions

Within a short time petitions for the initiation of a measure appropriating \$40,000 for the San Francisco exposition and \$35,000 for the San Diego exposition may be expected to make their appearance in Bisbee. Already they are being circulated in Phoenix. Those back of the movement hope to borrow the money in advance of its becoming available if their proposition should carry.

That if the plans of the two exposition committees shall be carried out the greater part of the proposed appropriations will be wasted in the opinion of the directors of the Warren District Commercial Club. It was pointed out to them by the secretary that he learned in Phoenix that the commission intends to erect two state buildings one at each exposition, and install exhibits in those buildings instead of in the exhibit palaces. He directed their attention to the cost of erecting such buildings in comparison to an ordinary installation of exhibits in the palaces that are prepared for them.

If buildings are erected by the commissions from the comparatively small sum that is available, those buildings, their cost of maintenance and the expense of two commissions occupying them will make a great hole in the \$75,000 and leave sum insufficient to gather an exhibit that would be in any way creditable to Arizona. It is conservative to say that half of the sum would be required for the building and expenses.

At expositions the state buildings in the past have been little more than club houses or meeting places with few exhibits in them, not visited by others than those directly interested in the state for some reason. In the exhibit palaces the exhibits are seen by all who pass through such palaces and it is to them that the thousands go.

The directors of the Commercial Club favor exhibits in the palaces, the spending of the entire amount for such exhibits, and strongly oppose a state building for Arizona at either exposition. They will write to the two commissions asking that they declare for the plan endorsed by the club. If such declaration is made it will be urged that the measure be adopted at the polls but otherwise the directors ask the citizens of the Warren District to refrain from signing the initiative petition and later, if it shall be initiated, to vote against the willful waste of state funds.

CARNIVAL COMPANY IS COMING TO DISTRICT

E. L. Williams, general agent, and Al Fisher, special agent, of the Campbell United Shows, arrived in the city yesterday in the interest of the Carnival Company which showed last week on the streets of El Paso. They have closed agreements for the company to show on the Lowell grounds at Lowell during the week of March 16 to 21. They assure the people of Bisbee of seeing what a real carnival company looks like.

Press reports from El Paso speak very highly of the show. The Carnival Company is at present in Deming, N. M., and will arrive in this city from Douglas on their own special train of eighteen cars. Their advertising car will arrive in this city on Tuesday, March 10.

ARMED MEXICANS ON THIS SIDE

Bisbee Party Finds Suspicious Encampment Near Sonora Line — Men Well Supplied and Heavily Armed.

Wm. Bardon returned yesterday from an outing trip, with which was combined the inspection of some mining properties, in the southwestern corner of the Huachuca. Returning home, Mr. Bardon said yesterday, his party encountered the camp of about a dozen Mexicans within half a mile of the Sonora border, on the American side. The men had horses and what looked to be a large supply of ammunition in boxes. They were all heavily armed, some having guns in hand as well as on their saddles.

Mr. Bardon said that it looked like a possible reception committee arranged for General Carranza among his friends and the enemy. In the near neighborhood, ranchers said the men had been camped near Toole spring for several days and that they had been kept under surveillance in the belief that they were possibly cattle rustlers or cattle smugglers expecting to run a bunch of hoofs over from the Sonora side, although it was considered not at all improbable that they had a more sanguinary mission in association with the coming of the chief of the Constitutionalists.

Mr. Bardon says that things generally are looking good in the Huachuca and that there are evidences of considerably more prospecting and mining than in some time.

MARINE MEMBERSHIP RACE GROWS WARM

The Eels are leading in the marine membership race at the Y. M. C. A. with the Sharks second.

Yesterday Dick Bateman of the Sharks swam a mile in the new swimming pool. This is the first time one person has swam this distance. Others are going to try it. Dick used the breast stroke.

Last night Messrs. Ruffner and Hayes gave a fifty-yard exhibition of the crawl stroke, doing it in 38 seconds.

The pennant of the Lobsters and Porpoises was hung in the lobby yesterday. Today the Sardines and the Sea Serpents will qualify in the membership contest by hanging their pennants to the breeze.

The Y. M. C. A. membership on March 1 was 575. It is the desire of the general secretary, Mr. E. A. Putnam, and the board of directors that the membership reach 750 by April 1.

PARENTS' NIGHT AT Y.

Tonight will be parents' night at the Y. M. C. A. The parents of the members of the boys' department of the Y. M. C. A., as well as the parents of the boys of the Boys' clubs, the Yugs and the Worms, are invited to spend a pleasant evening at the Y. M. C. A. The boys will furnish entertainment and refreshments, and moving pictures on the new Bug machine. The program will start at 7:30 p. m. Several musical numbers will be furnished by the Bugs. Parents will be given a chance to see the boys' new game room, swimming pool, and find out what the boys' department is doing for the boys. All parents of boys in the Warren district are cordially invited to be present at 7:30.

RACE PICTURES ON MONDAY AND TUESDAY

Monday and Tuesday nights, the Orpheum management was advised yesterday by wire, the Vanderbilt cup races of a hundred thrills over the Santa Monica course, will be at their theater.

The telegram also advised that the shipment of the pictures would be direct to Bisbee and that this city would be the first to have them in Arizona. Instructions to the Orpheum are to ship them to a Rheo theater, where the second showing will be made.

It is considered that these pictures on Monday and Tuesday nights of next week will comprise the biggest feature shown in the district in a long time. In timeliness they represent the quickest connection ever made between the point of occurrence of a great event and the picture curtains in this district.

WANT PAVING IN BREWERY GULCH

Property Owners in Business District Above the Present Line of Improvement Will Petition Council for Action

Agitation was started yesterday in Brewery Gulch above the end of the street, paying for the improvement of that important traffic center by the extension of the street paving, at least through the business district, and probably on up the Gulch.

I. C. E. Adams heads the movement and says that it will be taken before the next regular meeting of the city council, backed by a strong petition from property owners. Mr. Adams says that the rapid growth of business activity and population up Brewery Gulch, beyond the termination of street improvement, makes further paving a matter of much need.

Yesterday the property owners interviewed were pointed to accumulations of rubbish and filth along the unpaved portion of the street in the business locality. It was said that until paving was provided the keeping of the street clean of such undesirable accumulations was out of the question, at least with the present facilities of the city for street cleaning. Rubbish in the street in this part of the town gets its only satisfactory cleaning up in the storm periods, when water rushing down the canyon makes a clean sweep.

It was suggested that there might appropriately be made another clean-up day, particularly set aside for Brewery Gulch above the paving line, and that the property owners and the city street department join in a combined heroic effort to get this street in a sanitary condition before the coming of spring and then adopt some measure of which the city could find way of maintenance for keeping down the undesirable situation of the immediate present as much as possible. All of this of course, to be looked upon as merely temporary and the big movement for real paving go on unabated in the interim. Property owners joining in the program yesterday said that they considered the need of a little paving in this locality and at the upper end of Main street, for the benefit of business interests there, to seem a great deal more to the point at this time than paving on Naco road.

I have just received another GROSS ORDER of those SPECIAL SEVEN JEWEL, SIXTEEN SIZE GILMAN WATCHES that have met with such wonderful success as good, reliable timekeepers for every-day use. By having these watches made in such large quantities in the Waltham factory I am able to sell them complete in screw back and bezel nickel cases for the remarkably low price of \$5.00 each. If you have become disgusted with the cheaply made watches that never keep correct time, don't fail to get one of these GILMAN WATCHES that are absolutely guaranteed to give entire satisfaction.

SOLICITORS ASKANCE AT BARRIER Chief Object of New C. & A. Smelter Fence is to Keep Them Out of Grounds

DOUGLAS March 5.—At least one class of Douglas residents cannot be said to be highly pleased with the construction of an eight-foot board and barred wire barrier around the C. & A. smelter plant and the announcement that passes will hereafter have to be obtained from the office before a visit, can be paid to the plant. This consists of health and accident insurance solicitors who have hitherto passed freely through the smelter grounds at all times.

For a long time the Copper Queen smelter grounds have been closed to this class of activity the solicitors having to wait for the men to come off shift before they could approach them. The C. & A. was therefore practically the one place in which they could work freely.

Unless some special arrangement can be made with the management allowing the privilege of soliciting

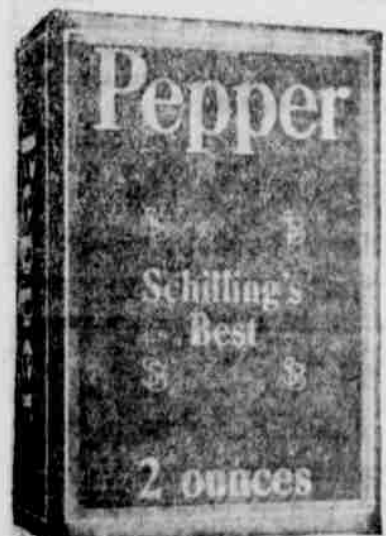

at certain periods weekly or monthly, the insurance solicitors here consider the outlook very gloomy and some may even be forced to leave.

SIX MONTHS FOR BLANDER. BERLIN, March 5.—For insulting the Crown Prince in a newspaper article, saying that "it would be public misfortune" if the Crown Prince ascended the throne, Hans Leuss, a writer, was sentenced to six months imprisonment. The article was entitled, "William the Last."
